## EDUCATION

---

### Guru Gobind Singh Indraprastha University

GPA: 8+/10

Delhi, INDIA

Aug. 2017 – Aug 2021

## EXPERIENCE

---

### Deloitte USI

Full Stack Developer

October 2024 – Present

New Delhi, INDIA

- Architected and delivered a high-performance microservices ecosystem using Spring Boot, reducing system latency by 40% and improving scalability for international clients.
- Implemented comprehensive security infrastructure with JWT, OAuth2, and Keycloak, mitigating potential vulnerabilities and ensuring GDPR compliance.
- Designed real-time data processing pipelines using Kafka Streams and RabbitMQ, enabling processing of 500K+ events per minute with minimal latency.
- Orchestrated cloud-native deployments through Docker, Kubernetes, and Helm charts, achieving 99.9% service uptime across production environments.
- Established performance monitoring framework with Grafana, Prometheus, and ELK stack, creating centralized dashboards that decreased incident response time by 65%.
- Pioneered CI/CD excellence by implementing Jenkins pipelines and GitHub Actions workflows, reducing deployment time from hours to minutes with zero-downtime releases.

### Xebia Technology

Senior Engineer

June 2024 – October 2024

Gurugram, INDIA

- Led the migration from monolithic architecture to microservices, reducing deployment cycles by 70% and enabling targeted scaling of system components.
- Designed and implemented domain-driven microservice boundaries, improving system maintainability and team autonomy across business domains.
- Developed custom authentication middleware with role-based access control using JWT, enhancing security while simplifying cross-service authentication.
- Optimized database interactions through carefully designed JPA repositories and query strategies, reducing database load by 35%.
- Created a distributed tracing system using Jaeger that identified and resolved critical performance bottlenecks across service boundaries.
- Mentored junior developers on microservices best practices, container orchestration, and DevOps methodologies, improving team velocity by 25%.

### BluePi Consulting Private Limited

Full-stack Senior Engineer

April 2023 – June 2024

Gurugram, INDIA

- Spearheaded the development of a cloud-native financial services platform, serving 50K+ daily users with 99.95% uptime.
- Implemented event-sourcing architecture with Kafka, enabling accurate audit trails and resilient system recovery mechanisms.
- Developed a custom circuit breaker implementation with Resilience4j that prevented cascading failures and improved system stability during peak loads.
- Created a unified API gateway layer to streamline client interactions with backend microservices, reducing frontend complexity by 40%.
- Built automated test suites with JUnit and Testcontainers, achieving 85%+ code coverage and detecting regression issues before production deployment.

- Designed and implemented blue/green deployment strategies, eliminating customer-facing downtime during application updates.

## Wipro Technology

August 2021 – April 2023

*Project Engineer*

*Bengluru, INDIA*

- Developed client-focused solutions using Java technologies, aligning implementations with business requirements and design specifications.
- Implemented back-end business layers with Spring and developed web services for data processing and integration.
- Created robust Java EE components using Spring MVC, Spring Core, Spring Rest, and Spring AOP.
- Built Java applications using the Spring framework and JPA repositories, maintaining high code quality with JUnit testing.
- Designed scalable architectures and developed RESTful APIs using Spring Boot as part of microservices-based systems.
- Deployed and orchestrated microservices using Kubernetes and Docker in cloud environments.
- Facilitated efficient inter-service communication using RabbitMQ for messaging and asynchronous processing.

## TECHNICAL SKILLS

---

- **Frameworks:** Spring Boot, React.js, Next.js, GraphQL, Apollo Server
- **Database:** JPA (Java Persistence API), Hibernate, SQL, Hasura
- **Web Development:** React.js, JavaScript, HTML, CSS
- **Languages:** Core Java, JavaScript
- **Tools:** Maven, Git, Docker, Bitbucket
- **Testing:** JUnit, Mockito

## PROFESSIONAL ATTRIBUTES

---

- |                             |                             |
|-----------------------------|-----------------------------|
| • Innovative Problem Solver | • Collaborative Team Player |
| • Continuous Learner        | • Detail-Oriented           |
| • Client-Focused            | • Adaptable                 |
