EDUCATION

Guru Gobind Singh Indraprastha University

GPA: 8+/10

Delhi, INDIA

Aug. 2017 – Aug 2021

EXPERIENCE

Turing

Full Stack Developer

October 2024 – Present

New Delhi, INDIA

- Architected and delivered a high-performance microservices ecosystem using Spring Boot, reducing system latency by 40% and improving scalability for international clients.
- Implemented comprehensive security infrastructure with JWT, OAuth2 mitigating potential vulnerabilities.
- Designed real-time data processing pipelines using Kafka Streams and RabbitMQ, enabling processing of events per minute with minimal latency.
- Established performance monitoring framework with Grafana creating centralized dashboards that decreased incident response time.
- Developed modern, responsive web interfaces using React.js, improving performance and user engagement through reusable components and optimized rendering.
- Built cross-platform mobile applications with React Native, sharing up to most of codebase between Android and iOS to speed up development and reduce maintenance overhead.
- Integrated React-based front-end applications with microservices via secure REST APIs and WebSockets, enabling real-time data synchronization and seamless user experience.

Xebia Technology

Senior Engineer

June 2024 – October 2024

Gurugram, INDIA

- Led the migration from monolithic architecture to microservices, reducing deployment cycles and enabling targeted scaling of system components.
- Designed and implemented domain-driven microservice boundaries, improving system maintainability and team autonomy across business domains.
- Developed custom authentication middleware with role-based access control using JWT, enhancing security while simplifying cross-service authentication.
- Optimized database interactions through carefully designed JPA repositories and query strategies, reducing database load by 35%.
- Created a distributed tracing system using Jaeger that identified and resolved critical performance bottlenecks across service boundaries.
- Developed scalable and interactive front-end applications using React.js, improving client-side performance and reducing page load times by 40%.
- Built cross-platform mobile applications using React Native, achieving faster time-to-market and consistent user experiences across Android and iOS platforms.
- Integrated React and React Native front-ends with backend microservices via secure REST and GraphQL APIs, ensuring seamless data flow and real-time synchronization.

BluePi Consulting Private Limited

Full-stack Senior Engineer

April 2023 – June 2024

Gurugram, INDIA

- Implemented event-sourcing architecture with Kafka, enabling accurate audit trails and resilient system recovery mechanisms.
- Developed a custom circuit breaker implementation with Resilience4j that prevented cascading failures and improved system stability during peak loads.
- Created a unified API gateway layer to streamline client interactions with backend microservices, reducing frontend complexity by 40%.

- Built automated test suites with JUnit and Testcontainers, achieving 85%+ code coverage and detecting regression issues before production deployment.
- Developed responsive and high-performance web applications using React.js, improving user engagement and reducing rendering latency.
- Built cross-platform mobile apps using React Native, ensuring a consistent and smooth user experience across Android and iOS devices.
- Integrated React.js and React Native frontends with the unified API gateway, enabling real-time data updates and secure client-server communication.

Wipro Technology

August 2021 – April 2023

Project Engineer

Bengluru, INDIA

- Developed client-focused solutions using Java technologies, aligning implementations with business requirements and design specifications.
- Implemented back-end business layers with Spring and developed web services for data processing and integration.
- Created robust Java EE components using Spring MVC, Spring Core, Spring Rest, and Spring AOP.
- Built Java applications using the Spring framework and JPA repositories, maintaining high code quality with JUnit testing.
- Designed scalable architectures and developed RESTful APIs using Spring Boot as part of microservices-based systems.
- Deployed and orchestrated microservices using Kubernetes and Docker in cloud environments.
- Facilitated efficient inter-service communication using RabbitMQ for messaging and asynchronous processing.

TECHNICAL SKILLS

- **Frameworks:** Spring Boot, React.js, React Native, Next.js, GraphQL, Apollo Server, NodeJS
- **Database:** JPA (Java Persistence API), Hibernate, SQL, Hasura, PostGress SQL
- **Web Development:** React.js, JavaScript, HTML, CSS
- **Languages:** Core Java, JavaScript
- **Tools:** Maven, Git, Docker, Bitbucket, CI/CD
- **Testing:** JUnit, Mockito
- **Cloud Technologies:** GCP, Azure

PROFESSIONAL ATTRIBUTES

- | | |
|-----------------------------|-----------------------------|
| • Innovative Problem Solver | • Collaborative Team Player |
| • Continuous Learner | • Detail-Oriented |
| • Client-Focused | • Adaptable |
